Message

Dear Friends of Pharmacology Family

As all of you know that Good Clinical Practice (GCP) is an international, ethical and scientific quality standard for the design, conduct, performance, monitoring, auditing, recording, analysis and reporting of clinical trials. As per guidelines of Indian Council of Medical Research (ICMR), a basic training in clinical research also known as GCP training or training in Good Clinical practice to be imparted to every person involved in clinical trial or new drug development research. This is even more pertinent given the many changes and amendments in the clinical trial and new drugs approval rules and regulations in India in recent years.

I am happy to share with you that National Association of Pharmacology and Therapeutics is organizing a national level online GCP training in the month of March 2023. This workshop is being organized in association with AIIMS, Nagpur.

Through this message, I invite you all to get benefitted with this unique GCP training activity where leaders in clinical research and renowned experts shall give deliberations and training and various important topics are going to be covered in this workshop.

For more details, please log on the website www.nationalpharmacology.org.
